

# BUBU Token Whitepaper

## Introduction

Labubu Coin (BUBU) is a community-driven memecoin built on the Solana blockchain. Our aim is to create a fun, engaging, and rewarding ecosystem for early investors and long-term supporters. The presale offers early adopters a significant opportunity before the token is officially listed on exchanges.

## Presale Details

- Token Name: Labubu Coin
- Token Symbol: BUBU
- Blockchain: Solana
- Total Supply: 1,000,000,000 BUBU
- Presale Allocation: 600,000,000 BUBU (60%)
- Presale Price: 1 SOL = 3,000,000 BUBU
- Listing Price: 1 SOL = 1,500,000 BUBU
- Target Raise: 200 SOL

## Tokenomics

- Presale: 60% (600,000,000 BUBU)
- Exchange Liquidity: 20% (200,000,000 BUBU)
- Marketing & Community: 10% (100,000,000 BUBU)
- Team & Advisors: 5% (50,000,000 BUBU)
- Strategic Reserve: 5% (50,000,000 BUBU)

## Transparency & Commitment

# **BUBU Token Whitepaper**

The team is committed to full transparency. The 5% allocation for the team will be locked for 6 months to ensure commitment and trust. Funds raised from the presale will be used to provide initial liquidity, initiate marketing campaigns, and support community building efforts.

In addition, any unsold tokens from the presale allocation will be permanently burned. This ensures a fair, deflationary supply and protects the value of tokens held by the community.

## **Vision**

We envision BUBU becoming a widely recognized memecoin on Solana, known for its fairness, transparency, and strong community. Our long-term mission includes NFT integration, community rewards, and ecosystem expansion.

## **Security Notice**

BUBU has no private sale and no VC investors. All tokens are fairly distributed. Always verify that you're using the correct presale link and never share your private keys.
